

Universal Hardware System

Our Universal Hardware System is designed for industrial applications. Studs on 2-inch centers allow for easy installs and easy replacement of PVC strips. This hardware can be mounted on the wall, inside the header/frame, on the ceiling or anywhere you choose. *\$16.00 Linear ft.*

Aluminum Bar Hardware System

The Aluminum Bar Hardware System allows for easy install and easy replacement of PVC strips. Individual strips can be replaced without disturbing or removing other strips by simply replacing the clasp(engineer) of the damaged strip, removing it and replacing the new strip. *\$12.00 Linear ft.*

Sliding Track Hardware System

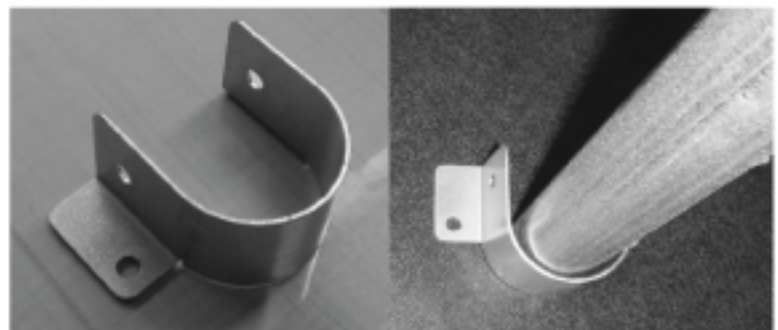

This unique sliding track hardware allows the clear vinyl strips to be mounted on trolleys that can be pushed completely clear of the opening, all to one side (or) evenly separated 50/50 to each side. *\$30.00 Linear ft.*

Sliding Truck & Reefer Door System

Our tough duty sliding truck door system is the perfect answer for trailer and refrigerated trucks that must maintain cold temperatures inside while unloading. Four panels of clear PVC are hung where two panels remain stationary and the two panels in the middle slide one to each side, right and left. This allows for an opening size for forklifts to pass through without having to traverse PVC strips. *Consult Factory*

U Series Hardware System

The U Series bracket and round bar construction is heavily used by the trucking industry for use in refrigerated transport. The U Series has a removable bolt in the "U" bracket which allows for the easy removal of the entire strip curtain in minutes. *Brackets only \$49.00 pair. Pipe extra.*
